Submitting Assignments for each Module

This class has gone paperless.

All homework assignments, labs, and reports are 'turned in' by filling out an online web submission form. The link for that form is located on the web site for the class. All submissions must be:

1. a single document,
2. web accessible, shared, and readable with a browser (not just down-loadable)
3. a single URL reference.

The document link contents will be reviewed for grading. If it does not meet the requirements it will not receive credit. Documents being graded **must be viewable** on a computer that does not have Word or logged into an account.

Work is due on the date of the assignment. Submissions are time-stamped for accuracy. Please make sure you receive an acknowledgment from Google that the submission is recorded.

How to Enable Private Browsing on Any Web Browser

by **Matt Klein** on February 15th, 2017

Private browsing has been around in one form or another since 2005, but it took some time for every browser to get behind it. Now, no matter what browser you use, you can surf the internet without leaving behind a local trail of history, passwords, cookies, and other assorted bits of information.

You are 'logged' out of any site when the 'Private' window is open

How do I know my document can be viewed for grading?
In Chrome: use a new *Incognito Window* and view the contents of your link
In Firefox: use a new *Private Window* and view the contents of your link
If you can see the contents with the window without being logged into anything, then they can be seen for grading.

https://www.howtogeek.com/269265/how-to-enable-private-browsing-on-any-web-browser/

Step 1 – create & save your document

1) Create a 'Word' document (or equivalent)

2) Answer the questions with text and typing

3) Screen capture illustrations and paste into document

4) Be sure to put the Date of the work completed and your name in the Header of the document. If there is not date, no credit can be given

5) Save the word document on your disk.

6) Upload to your Cloud drive and get link
